Fax: 020 7484 0599
E-mail:
andrew.owens@greenergy.co.uk

Greenergy has been supplying energy products and services since 1992 and pioneered the sales of low emission Cityfuels in the UK. Greenergy Cityfuels are a range of low emission fuels designed to give significant air quality benefits - without compromising on operatilty performance. Greenergy GlobalFuels are a new range of fuels specifically designed to give lowr levels of CO2. They consist of a blend of renewable energy and standard mineral oils. They are designed for use without engine modification and are produced to meet the requirements of motor vehicle manufacturers. They offer

the same local air quality benefits as our Cityfuels range. In addition to fuels, Greenergy's Carbon Asset Management systems and services support its clients' and the emerging business need for advice on and management of greenhouse gas emissions. Greenergy has operations in the UK, Switzerland, Germany and France.

No product or service. I am a private individual who wishes to join a British renewables forum with a view to moving my skills across to consultancy and/or project management in renewables, at some point in the future. I also have a small DIY livery (7 horses) and have always wondered when looking

at the steaming muck heap (skip), if there is something else that I can be doing with this "fuel" other than paying for it to be taken away and tipped into a household composting site.

Talbott's Heating Ltd

AG Kuhnle, Kopp & Kausch is rich in tradition, yet remains innovative in its approach to design and manufacture of its products: turbomachinery. The major application is the conversion of process by-products (palm oil, wood, waste, etc.) into clean, cheap, decentralized energy as well as the co-generation.
